

Use the arrows to navigate the presentation.

This shows the `.custom-title` class defined on `style/style_background.scss`. Any personalization should be applied directly there.

Some title
Some author

Slide with title

- Non
- Incremental
- Lists

Another slide with title

- Items
- Shown
- Incrementally

Yet another slide with title

- First
- Second
- Third
- Fourth

(all at once)

- First
- Second
- Third
- Fourth

(partially, and a slide without a title)

- Fourth
- Second
- Third
- First

(user defined order)

Columns

Some content (markdown, image, video)

Some content (markdown,
image, video)

Columns and fragments

Some content (markdown, image, video)

Some content (markdown,
image, video)

Some text tricks 2

Text can be personalized with standard html/css properties.

It is left-aligned by default.

Use this trick to
horizontally center
your text!

ABCDEFGHIJKLMNÑOPQR

TUVW XYZ ABCD EFGHIJKLM

STUVWXYZ ABCDEF

GHIJKLMNÑO PQRSTUVWXYZ

ABCD EFGHIJKLMNÑ OPQRS

TUVW XYZ ABCD EFGHIJKLM

NÑOPQR STUVW XYZ ABCDE

GHIJ KLMNÑ OPQRS TUVWXYZ

:((((content within columns is not automatically centered

ABCDEFGHIJKLMNÑOPQR

STUVWXYZ ABCDEF

GHIJKLMNÑO PQRSTUVWXYZ

ABCD EFGHIJKLMNÑ OPQRS

TUVW XYZ ABCD EFGHIJKLM

TUVW XYZ ABCD EFGHIJKLM

NÑOPQR STUVW XYZ ABCDE

GHIJ KLMNÑ OPQRS TUVWXYZ

:))) but we can use some dirty html tricks
